集成 Redis 二级缓存

一、阐述

〇 原始项目中没有引入缓存的概念,每一次执行操作都是与数据库交互(如下图),

```
Creating a new SqlSession
SqlSession [org. apache. ibatis.session. defaults.DefaultSqlSession@3a629162] was not registered for synchronization because synchronization is not active
Cache Hit Ratio [cn. shiyun. dao. UserDao]: 0.0

JBBC Connection [ProxyConnection[PooledConnection[com.mysql.jdbc.JDBC4Connection@79672e56]]] will not be managed by Spring

=> Preparing: [SELECT UserName, Password, Description from Users WHERE enabled=? and UserName=? and Password=?

=> Parameters: true(Boolean), admin(String), 1(String)

<== Columns: UserName, Password, Description

(== Row: admin, 1, null

<== Total: 1

Closing non transactional SqlSession [org. apache. ibatis.session.defaults.DefaultSqlSession@3a629162]
```

引入 Redis 缓存机制后,对于相同的操作没必要每次都与数据库交互(如下图);

```
Creating a new SqlSession

SqlSession [org. apache. ibatis. session. defaults.DefaultSqlSession@436646f7] was not registered for synchronization because synchronization is not active

Cache Hit Ratio [cn. shiyum. dao. UserDao]: 0.5

Closing non transactional SqlSession [org. apache. ibatis. session. defaults.DefaultSqlSession@436646f7]

Creating a new SqlSession

SqlSession [org. apache. ibatis. session. defaults.DefaultSqlSession@436646f7]

SqlSession [org. apache. ibatis. session. defaults.DefaultSqlSession@436646f7]

SqlSession [org. apache. ibatis. session. defaults.DefaultSqlSession@6de26eae] was not registered for synchronization because synchronization is not active

JDBC Connection [ProxyConnection[PooledConnection[com.mysql. jdbc. JDBC4Connection@79672e56]]] will not be managed by Spring

=> Preparine; select authority from authorities where authority != Admin'

=> Parameters:

(== Columns: authority

(== Row: Anonymous

<== Row: Anonymous
```

Redis 数据库中数据:

〇 添加单元测试

- 二、计划项(工作重心放到前端的优化上,并接上之前的(2017.07.21)的工作安排.)
 - ◆计划开发时间: 2017.07.28 至 2017.07.30
 - √ 消除原始项目中的 java 的代码片段,并将 xxx. jsp 文件优化成 xxx. html
 - ◆计划开发时间: 2017.07.31 至 ~
 - √ 研究基于 Anngular. js 的单页面 (SPA) 应用并用其优化前端代码
- 三、项目地址(暂时将优化的项目放到个人的 github 上,后期 master 下.)
